<sup>•</sup> Details and precautions on installation, maintenance and assembly can be found in the installation and or operation manuals.

<sup>·</sup> Details and precautions on recycling and/or disposal at end-of-life can be found in the installation and or operation manuals.

<sup>(\*)</sup> For heat pump space heaters and heat pump combination heaters, the rated heat output Prated is equal to the design load for heating Pdesignh, and the rated heat output of a supplementary heater Psup is equal to the supplementary capacity for heating sup(Tj).

<sup>(\*\*)</sup> If Cdh is not determined by measurement then the default degradation coefficient is Cdh = 0,9.

<sup>(\*\*\*)</sup> If the declared TOL is lower than the T designh of the considered climate then the outdoor dry bulb temperature Tj is equal to T designh.

<sup>•</sup> Details and precautions on installation, maintenance and assembly can be found in the installation and or operation manuals.

<sup>·</sup> Details and precautions on recycling and/or disposal at end-of-life can be found in the installation and or operation manuals.

<sup>(\*)</sup> For heat pump space heaters and heat pump combination heaters, the rated heat output Prated is equal to the design load for heating Pdesignh, and the rated heat output of a supplementary heater Psup is equal to the supplementary capacity for heating sup(Tj).

<sup>(\*\*)</sup> If Cdh is not determined by measurement then the default degradation coefficient is Cdh = 0,9.

<sup>(\*\*\*)</sup> If the declared TOL is lower than the T designh of the considered climate then the outdoor dry bulb temperature Tj is equal to T designh.

<sup>•</sup> Details and precautions on installation, maintenance and assembly can be found in the installation and or operation manuals.

<sup>·</sup> Details and precautions on recycling and/or disposal at end-of-life can be found in the installation and or operation manuals.

<sup>(\*)</sup> For heat pump space heaters and heat pump combination heaters, the rated heat output Prated is equal to the design load for heating

Pdesignh, and the rated heat output of a supplementary heater Psup is equal to the supplementary capacity for heating sup(Tj).

<sup>(\*\*)</sup> If Cdh is not determined by measurement then the default degradation coefficient is Cdh = 0,9.

<sup>(\*\*\*)</sup> If the declared TOL is lower than the T designh of the considered climate then the outdoor dry bulb temperature Tj is equal to T designh.

<sup>·</sup> Details and precautions on recycling and/or disposal at end-of-life can be found in the installation and or operation manuals.

<sup>(\*)</sup> For heat pump space heaters and heat pump combination heaters the rated heat output Prated is equal to the design load for heating

Pdesignh, and the rated heat output of a supplementary heater Psup is equal to the supplementary capacity for heating sup(Tj).

<sup>(\*\*)</sup> If Cdh is not determined by measurement then the default degradation coefficient is Cdh = 0,9.

<sup>(\*\*\*)</sup> If the declared TOL is lower than the T designh of the considered climate then the outdoor dry bulb temperature Tj is equal to T designh.

<sup>•</sup> Details and precautions on installation, maintenance and assembly can be found in the installation and or operation manuals.

<sup>·</sup> Details and precautions on recycling and/or disposal at end-of-life can be found in the installation and or operation manuals.

<sup>(\*)</sup> For heat pump space heaters and heat pump combination heaters, the rated heat output Prated is equal to the design load for heating

Pdesignh, and the rated heat output of a supplementary heater Psup is equal to the supplementary capacity for heating sup(Tj).

<sup>(\*\*)</sup> If Cdh is not determined by measurement then the default degradation coefficient is Cdh = 0,9.

<sup>(\*\*\*)</sup> If the declared TOL is lower than the T designh of the considered climate then the outdoor dry bulb temperature Tj is equal to T designh.

<sup>·</sup> Details and precautions on recycling and/or disposal at end-of-life can be found in the installation and or operation manuals.

<sup>(\*)</sup> For heat pump space heaters and heat pump combination heaters, the rated heat output Prated is equal to the design load for heating

Pdesignh, and the rated heat output of a supplementary heater Psup is equal to the supplementary capacity for heating sup(Tj).

<sup>(\*\*)</sup> If Cdh is not determined by measurement then the default degradation coefficient is Cdh = 0,9.

<sup>(\*\*\*)</sup> If the declared TOL is lower than the T designh of the considered climate then the outdoor dry bulb temperature Tj is equal to T designh.

<sup>•</sup> Details and precautions on installation, maintenance and assembly can be found in the installation and or operation manuals.

<sup>·</sup> Details and precautions on recycling and/or disposal at end-of-life can be found in the installation and or operation manuals.

<sup>(\*)</sup> For heat pump space heaters and heat pump combination heaters, the rated heat output Prated is equal to the design load for heating

Pdesignh, and the rated heat output of a supplementary heater Psup is equal to the supplementary capacity for heating sup(Tj).

<sup>(\*\*)</sup> If Cdh is not determined by measurement then the default degradation coefficient is Cdh = 0,9.

<sup>(\*\*\*)</sup> If the declared TOL is lower than the T designh of the considered climate then the outdoor dry bulb temperature Tj is equal to T designh.

<sup>•</sup> Details and precautions on installation, maintenance and assembly can be found in the installation and or operation manuals.

<sup>·</sup> Details and precautions on recycling and/or disposal at end-of-life can be found in the installation and or operation manuals.

<sup>(\*)</sup> For heat pump space heaters and heat pump combination heaters, the rated heat output Prated is equal to the design load for heating Pdesignh, and the rated heat output of a supplementary heater Psup is equal to the supplementary capacity for heating sup(Tj).

<sup>(\*\*)</sup> If Cdh is not determined by measurement then the default degradation coefficient is Cdh = 0,9.

<sup>(\*\*\*)</sup> If the declared TOL is lower than the T designh of the considered climate then the outdoor dry bulb temperature Tj is equal to T designh.

<sup>•</sup> Details and precautions on installation, maintenance and assembly can be found in the installation and or operation manuals.

<sup>·</sup> Details and precautions on recycling and/or disposal at end-of-life can be found in the installation and or operation manuals.

<sup>(\*)</sup> For heat pump space heaters and heat pump combination heaters, the rated heat output Prated is equal to the design load for heating

Pdesignh, and the rated heat output of a supplementary heater Psup is equal to the supplementary capacity for heating sup(Tj).

<sup>(\*\*)</sup> If Cdh is not determined by measurement then the default degradation coefficient is Cdh = 0,9.

<sup>(\*\*\*)</sup> If the declared TOL is lower than the T designh of the considered climate then the outdoor dry bulb temperature Tj is equal to T designh.

<sup>·</sup> Details and precautions on recycling and/or disposal at end-of-life can be found in the installation and or operation manuals.

<sup>(\*)</sup> For heat pump space heaters and heat pump combination heaters, the rated heat output Prated is equal to the design load for heating

Pdesignh, and the rated heat output of a supplementary heater Psup is equal to the supplementary capacity for heating sup(Tj).

<sup>(\*\*)</sup> If Cdh is not determined by measurement then the default degradation coefficient is Cdh = 0,9.

<sup>(\*\*\*)</sup> If the declared TOL is lower than the T designh of the considered climate then the outdoor dry bulb temperature Tj is equal to T designh.

<sup>•</sup> Details and precautions on installation, maintenance and assembly can be found in the installation and or operation manuals.

<sup>•</sup> Details and precautions on recycling and/or disposal at end-of-life can be found in the installation and or operation manuals.

<sup>(\*)</sup> For heat pump space heaters and heat pump combination heaters, the rated heat output Prated is equal to the design load for heating

Pdesignh, and the rated heat output of a supplementary heater Psup is equal to the supplementary capacity for heating sup(Tj).

<sup>(\*\*)</sup> If Cdh is not determined by measurement then the default degradation coefficient is Cdh = 0,9.

<sup>(\*\*\*)</sup> If the declared TOL is lower than the T designh of the considered climate then the outdoor dry bulb temperature Tj is equal to T designh.
